EXPERIENCE

SUMMER INTERN AT MRN DIGITAL
JUN 2020 – JUL 2020

- Responsible to help in developing a web blogging application.
- Helped the frontend team with ReactJS for development of web interfaces.
- Created a back-end REST API server with Node.js and Express, with many features like user login and authentication, image uploads, notifications, cloud functions, deploying to Firebase and associated tasks.
- Used Redux for state management.

SUMMER INTERN AT WHARF STREET STRATEGIES
MAY 2019 – JUN 2019

- Responsible to make an automated WhatsApp newsletter, which responds automatically to messages and performs CRUD operations for subscribers. In the initial stages, used Tkinter for GUI, and the entire logic was written in Python with the help of selenium and web scraping, whereas the database was stored in a CSV file. Thereafter, used Django to make the product more versatile. I handled both, the front end and the back end.
- Got Recommended by my Direct Manager on LinkedIn.

PROJECTS

FOODMALL MANAGEMENT SOFTWARE

- VIT Hostel's Foodmall Management Software makes the Foodmall to run smoothly. The mission of this project is to facilitate easy management and administration of the foodmall in VIT with capabilities to do Billing of the orders, communication among the employees, Observing and Analyzing reports/statistics, adding and removing students for each month, Total monthly billing etc. using the computerized food mall management software.

UNBEATABLE TIC-TAC-TOE

- The unbeatable Tic Tac Toe project is programmed in python language by using Artificial Intelligence using mini-max algorithm. The interface was created with Pygame.

TRACK-COVID

- The Track-Covid is a live project which uses two different templates for India's map along with the essentials like logo, state's code, etc. The data of state-wise COVID-19 cases in India are stored it in the street code format in a CSV file. Thereafter, the template picture is edited using Pillow. Finally, the post is automatically posted on Instagram.
