EXPERIENCE

SUMMER INTERN AT MRN DIGITAL
JUN 2020 – JUL 2020

- I was responsible to make a complete web application which was a blogging web app
- Used ReactJS for development of web interfaces
- Created a back-end REST API server with Node.js and Express, with many features like user login and authentication, image uploads, notifications, cloud functions, deploying to Firebase and associated tasks.
- Used Redux for state management.

SUMMER INTERN AT WHARF STREET STRATEGIES
MAY 2019 – JUL 2019

- I was responsible to make an automated WhatsApp newsletter, which responds automatically to messages, manages the subscribers (add or delete). In the initial stages, used Tkinter for GUI, and the entire logic was written in Python with the help of selenium and web scraping, whereas the database was stored in a CSV file. Thereafter, used Django to make the product more versatile. I handled both, the front end and the back end.
- Got Recommended by my Direct Manager on LinkedIn

PROJECTS

VITSPOT TEAM

- VITspot is a site/application which acts as a medium to communicate among all VITians by sharing the question papers, allowing two people to share cabs and allow a person to find his/her roommate. It also aims to keep a VITian up to date with all the happenings in and around the campus being updated. I helped in the UI/UX prototyping and development. Was a direct manager with a few initial members. VISIT www.vitspot.com or checkout our application on google play store.

UNBEATABLE TIC-TAC-TOE

- Made an unbeatable Tic Tac Toe in programmed in python language by using Artificial Intelligence. The interface was created with an interactive library of Pygame, which allowed me to make a beautiful interface for the same.

TRACK-COVID

- Made two different templates for India's map along with the essentials like logo, state's code, etc. Got the data of state-wise COVID-19 cases in India and store it in the street code format in a CSV file. Thereafter, I edited and wrote over the template using Pillow and other relevant libraries which might come in handy.Finally, automated the process of posting on Instagram.

EDUCATION

B. TECH (INFORMATION TECHNOLOGY) – VIT, VELLORE

- CGPA: 8.78

HSC (12th) - ARMY PUBLIC SCHOOL, NOIDA

- PERCENTAGE: 93.4%

SSLC (10th) - ARMY PUBLIC SCHOOL, NOIDA

- CGPA: 9.8

SKILLS

- Data Structures and Algorithms
- Problem Solving
- Web and Android Development
- Agile Planning for Software Development
- Database Management Systems
- Machine Learning
- Artificial Intelligence
- Leadership and Management

ACHIEVEMENTS

- **Google Foobar Challenge**: Competed in the Google's famous challenge and was one of the few to pass all the five levels. Used complex algorithmic concepts like Burnside's Lemma and Cellular Automata to solve these challenges
